

PRESS RELEASE

NAVYA helps to SERAIR Airline to update its operational procedures to the new EASA-OPS.

Madrid. 25/03/2014

NAVYA has completed for the Spanish air operator SERAIR the update of its Operations Manual and Procedures in order to meet the requirements of the new EASA-OPS regulatory provisions.

The technical assistance provided by NAVYA to SERAIR aimed to respond to the adaptation needs arising from the new regulations **EASA-OPS Part D** and meet the requirements of the Spanish aviation authorities in relation to its engineering operations.

This included the update of the Operations Manual and procedures and the resolution of eventual **discrepancies** posed by **Spanish Civil Aviation Authorities** in order to comply with ongoing regulatory changes.

SERAIR is the first and major transporter of cargo between the Canary Islands with more than 150 inter-insular flights per week. The air operator is specialized in air taxi and transport of press and fresh goods, both, between Canary Islands and between Europe and Africa.

In addition, the air operator has been granted with a Training certificate by the Spanish Aviation Authorities and holds a Medicalized Aircraft, used for medical evacuations and transport of patients.

NAVYA is a world leader in highly specialized solutions for the aviation industry, including, among others, design of Airspace and Flight Procedures, operations, maintenance, safety, strategic and business consulting for Airports, Air Operators and Air Navigation Service Providers, Aeronautical Certificates, Legal assistance and on/off-line Training.
